What is Effio?

"Effio" means "Enhanced Features and Fine Image Processor", and it is a Sony signal processor which realizes high resolution, high S/N ratio and high color reproduction for security camera.

What Effio can promise?

High Resolution

Higher horizontal resolution of over 650TVL by 960H CCD image sensor

Noise Reduction

Noise reduction is a function that reduces the image noise in order to improve the image quality of the camera. In particular, it reduces the noise which is generated under low-brightness shooting conditions and other high-gain states.

Excellent Color Reproduction

Excellent color reproduction under variety of light sources [1,800K to 10,500K]

Preset OSD Menu

The "Effio-E" (CXD4127GG) includes OSD (on-screen display) functions that allow camera settings to be made using the display. This function provides preset menus in eight languages (English, French, German, Spanish, Portuguese, Chinese, Russian, and Japanese) and allows camera settings to be made easily without using an external microcontroller.

Other models available!
